LONGO, PH.D., 2 Called as a witness, having been first duly sworn, 3 Testified on his oath as follows: 4 DIRECT EXAMINATION 5 BY MS. COLE: 6 Q. Dr. Longo, before we get started, there are some 7 folks here that have some objections that they want to place 8 on the record. So you can finish eating your cantaloupe, and 9 we'll do the objections, and then we'll get started. 10 MS. CAFFREY: This is Sharon Caffrey on behalf 11 of Borinquen Insulation Company. Some time ago 12 Mr. Wilczynski on behalf of the defendants requested all the 13 background materials that Dr. Longo was going to reply upon 14 for his opinions today. 15 I received those materials in my office Friday 16 at approximately 11:00 a.m. for the first time, and it was 17 the day before a holiday weekend. The box consisted of 18 ten pounds of material. There were eight binders and nine 19 videos, and it was humanly impossible to get through all of 20 these materials. 21 In addition, I've already sent letters to 22 counsel objecting to what we view as an expansion of 23 Dr. Longo's originally designated testimony to include 24 products other than CertainTeed gaskets and Unibestos. We 25 believe it's in violation of the case management order and</p>

<p style="text-align: right;">Page 101</p> <p>1 or you didn't receive it?</p> <p>2 A. I received it. I have a degree that says Master</p> <p>3 of Science and Engineering.</p> <p>4 When I say completed the requirements, at the</p> <p>5 University of Florida Material Science Department, once -- if</p> <p>6 you -- if you are able to pass your Ph.D. qualifiers, which</p> <p>7 essentially is three days of examination of all the graduate</p> <p>8 level courses taught in that department, they bestow a</p> <p>9 Master's on you.</p> <p>10 So it's not a Master's in some sense in which</p> <p>11 people have to write a thesis.</p> <p>12 Q. All right. What did you do between June of 1977</p> <p>13 when you got your BS at the University of Florida, and I</p> <p>14 understand all of your schooling is there, what did you do</p> <p>15 until 1983?</p> <p>16 A. I was in school.</p> <p>17 Q. Studying for your Master's or your Ph.D.?</p> <p>18 A. Well, both.</p> <p>19 Q. Did you work at all?</p> <p>20 Did you work at all during that period?</p> <p>21 A. I worked in the Material Science Department as a</p> <p>22 graduate assistant.</p> <p>23 Q. Okay. No outside work?</p> <p>24 A. No, sir.</p> <p>25 Q. Have you had any -- I'll withdraw the question.</p>	<p style="text-align: right;">Page 103</p> <p>1 today?</p> <p>2 A. No, sir.</p> <p>3 Q. You've never submitted those in this case, have</p> <p>4 you?</p> <p>5 A. I'm sure back in 1999 I did.</p> <p>6 Q. They weren't attached with your report or your</p> <p>7 resume. I have checked with the other lawyers here. None of</p> <p>8 us got them.</p> <p>9 Do you have an idea what you billed to these</p> <p>10 plaintiffs' lawyers in this case to date?</p> <p>11 A. To do that report -- I don't have any independent</p> <p>12 recollection. But to do that report probably took two or</p> <p>13 three hours at a hundred and seventy-five an hour.</p> <p>14 Q. Okay. I didn't see any type of case log with</p> <p>15 your report or your CV.</p> <p>16 Do you have a case log of where you've</p> <p>17 testified in depositions and trials listing the state or the</p> <p>18 county, the court, who hired you, plaintiffs or defendants?</p> <p>19 A. I don't have any up-to-date one, no.</p> <p>20 Q. And you haven't submitted any in this case at</p> <p>21 all, have you?</p> <p>22 A. No, sir.</p> <p>23 Q. In your CV, you have got an article -- by the</p> <p>24 way, did you bring any of those articles with you other than</p> <p>25 these reports you have that you list in your CV or you got a</p>
<p style="text-align: right;">Page 102</p> <p>1 What are your billing rates for this case?</p> <p>2 A. Two seventy-five an hour for deposition and trial</p> <p>3 testimony, a hundred and seventy-five an hour for consulting,</p> <p>4 and a hundred and fifty dollars an hour for travel.</p> <p>5 Q. You mean, you get a hundred and fifty-eight</p> <p>6 dollars -- did you say a hundred and fifty-eight?</p> <p>7 A. A hundred and fifty.</p> <p>8 Q. Oh, a hundred and fifty dollars an hour for</p> <p>9 driving your car?</p> <p>10 A. Driving my car, sitting on a plane, in an</p> <p>11 airport, whatever.</p> <p>12 Q. And if this -- and how much an hour for your</p> <p>13 deposition for sitting here answering these questions?</p> <p>14 A. Two seventy-five an hour.</p> <p>15 Q. And if you come down for trial in this case, what</p> <p>16 is your trial testimony per hour?</p> <p>17 A. Two seventy-five.</p> <p>18 Q. Okay. And then do you charge for that -- would</p> <p>19 you charge these plaintiffs' lawyers two seventy-five an hour</p> <p>20 to fly down there, too, or do you get the hundred and fifty</p> <p>21 dollar an hour driving time?</p> <p>22 A. They get the hundred and fifty dollars an hour</p> <p>23 drive time.</p> <p>24 Q. Okay. I haven't seen your bill in this case --</p> <p>25 any of your billing records. Did you bring those with you</p>	<p style="text-align: right;">Page 104</p> <p>1 bunch of articles you either contributed to or co-authored?</p> <p>2 A. No, sir, I didn't.</p> <p>3 Q. Okay. There's one on Page 3 of your CV that you</p> <p>4 did which looks like a Roggli?</p> <p>5 A. Roggli.</p> <p>6 Q. Roggli.</p> <p>7 The Mineral Fiber Content of Lung Tissue in</p> <p>8 Patients with Environmental Exposures: Household Contacts</p> <p>9 vs. Building Occupants.</p> <p>10 A. Yes, sir.</p> <p>11 Q. What's that about?</p> <p>12 A. That's about some mesothelioma cases in which the</p> <p>13 individuals had very, very low exposure, and these</p> <p>14 individuals were household contacts, meaning somebody else</p> <p>15 brought it into their house, and, also, they worked in</p> <p>16 buildings that contained asbestos. And we were looking at</p> <p>17 the lung burden of how much asbestos was in the lungs of</p> <p>18 these individuals and then compared it to occupational</p> <p>19 exposures.</p> <p>20 Q. All right. A minute ago in your testimony when</p> <p>21 you were answering questions with Ms. Cole, I believe you</p> <p>22 mentioned asbestos in schools. What other kinds of buildings</p> <p>23 and things have you found the asbestos in that people have</p> <p>24 been exposed to?</p> <p>25 A. Well, just about every building built between the</p>

Page 105

1 timeframe of about 1950 to 1972, '73 had some sort of
2 asbestos construction product in it.

3 Q. Where in the buildings?

4 A. Usually if it's a multi-story building it has
5 fireproofing during that timeframe that would be asbestos
6 there. If it's a school or an auditorium or a hospital or
7 courtroom or jail, you usually will have acoustical plasters
8 during that timeframe that had asbestos in it. Ceiling tiles
9 will have asbestos in it during that timeframe. Floor tiles,
10 thermal insulation on heating systems if they have
11 temperatures that run that range and joint compounds. Those
12 are, I'd say, the majority of what's found in buildings from
13 the fifties to '72.

14 Q. In addition to that, have you done any work with
15 respect to the amount of exposure that people may get from
16 the asbestos fibers that they used to have in the brakes and
17 brake linings? Have you done any work in that?

18 A. Yes.

19 Q. Were any studies you did based upon any type of
20 exposure levels to people who had, say, mechanical garages or
21 worked in garages, anything like that?

22 A. Yes. That's the studies we've done would be
23 mechanics who either changed brakes out, used compressed air
24 or did some sort of grinding on the brake shoes to fit the
25 contour back to the wheel drums.

Page 106

1 Q. Is there -- as a result of the -- was there a
2 period in time as a result of mechanics and other people that
3 worked with brakes a lot being exposed -- a level of asbestos
4 in the air actually from people putting on brakes out in the
5 streets in cities where there's heavy congestion of traffic?

6 A. There have been studies of what is generated from
7 brake systems out in the streets when they used to have brake
8 shoes, and most of the braking systems in automobiles are
9 closed-in systems, very little really escaped out on city
10 streets in my opinion.

11 Q. What other exposures -- household contacts would
12 people have other than those you've mentioned?

13 A. Usually that's it.

14 Q. Talcum powder that was used on babies, did some
15 of that contain asbestos?

16 A. We've looked. We have not found it.

17 Q. You're not aware of any?

18 A. I'm not aware of us ever proving that talcum
19 powder had tremolite or anthophyllite.

20 MR. BRYANT: I thank you, sir. I have no
21 further questions.

22 CROSS-EXAMINATION
23 BY MR. GEIGEL:

24 Q. Good morning, Mr. Longo. I'm Eugenio Geigel. I
25 represent Rubber & Gasket Company of Puerto Rico.

Page 107

1 Doctor, do you consider yourself a scientist?

2 A. Yes.

3 Q. As part of your report, did you ever look at the
4 purchase orders of Harvey Aluminum or --

5 A. No, sir.

6 Q. -- any of the other --

7 A. I have not.

8 Q. In your report the one we've got on Page 3 the --
9 Page 2 -- I think it's Page 2 of the report, subtitled
10 William E. Longo, Ph.D. Qualifications, the fifth paragraph
11 reads: These tests were conducted to determine if
12 individuals performing routine work practices around
13 asbestos -- it goes on.

14 What do you consider to be routine work
15 practices?

16 A. Hold on. I'm having trouble finding it.

17 MR. HARTLEY: Which paragraph?

18 MR. GEIGEL: The fifth paragraph.

19 A. Well, routine work practices involving thermal
20 insulation is that individuals would have to do two things
21 routinely; handle the material to place it on systems and
22 from time to time cut the material.

23 Q. (Mr. Geigel:) Nothing else?

24 A. That's the only practices we measured.

25 Q. Right below that in the next -- it's not a

Page 108

1 complete paragraph. It's the next -- would be the next
2 paragraph it reads: Dr. Longo will testify about the results
3 of these studies and provide testimony on how the routine use
4 and disturbance of asbestos-containing thermal insulation,
5 flat sheet gasket material -- and it goes on and on.

6 My question to you, sir, is what do you
7 consider to be routine use and disturbance of
8 asbestos-containing insulation?

9 A. Routine use would be, of course, insulating
10 pipes, insulating boilers, insulating vessels to keep the
11 heat in. Also during that insulation, the cutting,
12 especially on vessels where you had to change the curvature
13 of the block, and also another routine use is its removal
14 during maintenance, such as pipe that needs to be fixed or a
15 steam line or a flange that has to be removed, thermal
16 insulation is typically removed.

17 Q. Now, you are aware of federal regulations
18 regarding asbestos exposure, correct?

19 A. Some of them, yes.

20 Q. Are you aware of the state or territorial
21 regulations for asbestos?

22 A. No.

23 Q. What they are?

24 A. No.

25 Q. Would you say that some states normally comply

Page 109

Page 111

1 but go beyond what federal regulations require?

2 MR. HARTLEY: Object to the form.

3 A. Again, I'm not that aware of the different
4 states, I'm more aware of the federals. I can't tell you if
5 the state regulations are as good as or better or worse. I
6 can't tell you.

7 Q. (Mr. Geigel:) All right. Are you familiar with
8 all types of gaskets?

9 A. Pretty much.

10 Q. Are you familiar with the difference of
11 manufacturing of gaskets?

12 MR. HARTLEY: Object to the form.

13 A. And again, let me back up. When you say all
14 types of gaskets, I'm mostly familiar with flat sheet gaskets
15 that contain asbestos, the Flexitallic-type gaskets. I'm not
16 familiar with every gasket that's been made, no.

17 Q. (Mr. Geigel:) Would you consider pulling
18 asbestos gaskets from shelves to be within your definition of
19 disturbance -- routine use and disturbance of asbestos?

20 A. Certainly the pulling of asbestos gaskets from
21 shelves is a routine use of the gaskets if they're on the
22 shelf and you have to pull them. The mere handling of an
23 asbestos gasket is not what I would term as a major
24 disturbance of the gasket. Unless you damage or cut or
25 fabricate, after you fabricate these gaskets or removal is

1 about your studies because they were considered to be by the
2 Court "junk science"; is that correct?

3 A. That's what Judge Levitts stated.

4 Q. How many times have you been precluded from
5 discussing your studies in court?

6 A. Once.

7 MR. DALEY: Sharon, could you get closer to
8 the microphone, please?

9 MS. CAFFREY: No, I can't.

10 MR. DALEY: That's better what you just said.

11 MS. CAFFREY: All right. I'll try to yell,
12 Rick.

13 MS. COLE: Turn up your hearing aid, Rick.

14 MR. DALEY: It's on ten.

15 Q. (Ms. Caffrey:) Have you been precluded -- in
16 addition to the In Re: Lamar County Case, have you been
17 precluded by other courts from using your videos at trial?

18 A. Oh, sure. I would estimate about five percent of
19 the time. The judge will rule that they're prejudicial and
20 inappropriate.

21 Q. And do you recall which courts or judges have
22 precluded your videos?

23 A. No, that's not something I keep score of.

24 Q. Am I correct that all of your studies or
25 simulations were done for litigation either directly when you

Page 110

Page 112

1 where I believe the primary exposures are. I don't believe
2 handling asbestos-containing sheet gaskets gives much of an
3 exposure.

4 MR. GEIGEL: Thank you, sir.

5 MR. TURLIK: I pass.

6 MR. HYMES: No questions.

7 MR. WHITE: No questions.

8 MR. HUNTER: No questions.

9 MR. FITZSIMMONS: No questions.

10 MR. WOODBURY: No questions.

11 MS. CAFFREY: I have a few questions for you,
12 and I'm going to ask these questions based upon the report
13 that we have before us and subject to my prior objections.

14 CROSS-EXAMINATION

15 BY MS. CAFFREY:

16 Q. Dr. Longo, --

17 A. Yes.

18 Q. -- you have been precluded from testifying in at
19 least one jurisdiction of which I'm aware, have you not?

20 A. That's not true.

21 Q. Do you remember being precluded in Texas in the
22 In Re: Lamar County Asbestos Litigation?

23 A. I remember that my studies was precluded. If you
24 read the order, I was not personally precluded.

25 Q. So you were not -- you were not allowed to talk

1 were asked by counsel or something that you did to support
2 the theories on which you intended to testify?

3 MR. HARTLEY: Object to the form.

4 A. No, you're incorrect. I don't do any of these
5 studies for litigation.

6 Q. (Ms. Caffrey:) Well, you were hired by
7 counsel -- plaintiffs' counsel at least fifty percent of the
8 time to do the studies, correct?

9 A. Well, I think more or less -- I think that's
10 maybe in the ballpark. But we've been hired by plaintiffs'
11 counsel to do the studies, we've been hired by defense
12 counsel to do these studies. But each of these groups have
13 to agree that this data will be shared publicly one way or
14 the other. So I don't consider these for litigation. Some
15 of these studies have never been in litigation. I look at it
16 as research in this area.

17 Q. What defense counsel has hired you to do studies?

18 A. I can't talk about one that's -- we're talking
19 about -- I mean, one we'll do in the future. But we have
20 done a work practice study for Carborundum. Tom Tardy was
21 the defense attorney out of Mississippi.

22 Q. Anybody else?

23 A. That's the only one I can talk about right now.

24 Actually I've got two, two more that we're
25 talking to.

Page 117

1 couldn't hear your answer, what is SBR?

2 A. Styrene Butadiene Rubber.

3 Q. And all of the gaskets referred to in the report
4 that you have in front of you that was filed in this case
5 involved gaskets with that type of grinder?

6 A. Yes, sir.

7 Q. And, again, you don't have any specific
8 information about the work histories or the specific manner
9 in which either of the four plaintiffs whose cases are
10 scheduled for trial in November were exposed to
11 asbestos-containing products in the HOVIC Refinery, do you?

12 A. I do not.

13 MR. DALEY: I don't think I have anything
14 else.

15 MR. HARTLEY: Anyone else on the telephone or
16 elsewhere?

17 MS. O'CONNOR: No questions.

18 (Whereupon the deposition concluded
19 at 1:50 p.m.)

2 I, ANGELA L. KLEIN, a Registered Professional
3 Reporter and Notary Public for the U.S. Virgin Islands,
4 Christiansted, St. Croix, do hereby certify that the
5 above-named witness, William E. Longo, Ph.D., was
6 first duly sworn to testify the truth; that said witness
7 did thereupon testify as is set forth; that the answers
8 of said witness to the oral interrogatories propounded by
9 counsel were taken by me in Stenotype and thereafter
10 reduced to typewriting under my personal direction and
11 supervision.

12 I further certify that the facts stated in the
13 caption hereto are true; and that all of the proceedings
14 in the course of the hearing of said deposition are
15 correctly and accurately set forth herein.

16 I further certify that I am not counsel, attorney or
17 relative of either party, nor financially or otherwise
18 interested in the event of this suit.

19 IN WITNESS WHEREOF, I have hereunto set my hand as
20 such Registered Professional Reporter and Notary Public
21 on this the 8th day of July, 2002, at Christiansted,
22 St. Croix, United States Virgin Islands.
